**Considerations**

- Great option for institutional or other projects requiring the best coating performance.
- Architectural grade coating field tested for generations.
- Soot residue, caking, and erosion is unavoidable and will cause the finish to blemish, especially along board edges. This is a natural characteristic of this product.
- To prevent blocking between boards as well as abrasion blemishes, keep boards slip-sheeted until installation.

**Patina Scale**

The Patina Scale has been developed by Nakamoto Forestry to approximate how its products will weather over time—from 0 ("less patina/more color longevity") to 10 ("less color longevity/more patina"). However, every product weathers at a different rate due to local conditions, and the Patina Scale is intended as general guidance only, and is solely for informational purposes. Nakamoto Forestry makes no guarantees, representations, or warranties, express or implied, regarding the appearance or color longevity of its products after installation.

**Wood Grade Select**

JAS "Small Knot" grade allows for up to 20 tight or 10 dead knots per 79" (2m) board length. Unlimited combination of heartwood and sapwood, pith allowed. Checks allowed to 1/16" as long as plank stability, weather-resistance, and cosmetics are not adversely affected.

**Premium Clear**

Premium Clear grade allows for up to 4 tight or 3 dead pinhole knots per 79" (2m) board length. Unlimited combination of heartwood and sapwood, no face pith allowed. Checks allowed to 1/16" as long as plank stability, weather-resistance, and cosmetics are not adversely affected.
