## Fasteners - Painted Black

Use these fasteners for a polished, efficient installation, and to achieve optimal durability. Nakamoto Forestry does not require the purchase of accessories as part of a lumber package. However, accessories used must meet our installation parameters and local code. Always follow manufacturer installation requirements.

Exteriors must be properly sealed and flashed in a shingle fashion to prevent moisture intrusion and buildup. Always have a design professional review project installation parameters relative to your local building code and regional best practices for managing moisture and water vapor in your area.
